

Capital Adequacy and Other Information Subject to Disclosure of the Alior Bank Spółka Akcyjna Capital Group as at 31 December 2021

Disclosure Pillar III

List of Tables for the period 2021/12

No.	Table
1.	EU OV1 – Overview of total risk exposure amounts
2.	EU KM1 – Key metrics template
3.	EU INS1 – Insurance participations
4.	EU INS2 – Financial conglomerates information on own funds and capital adequacy ratio
5.	EU OVC – ICAAP information
6.	EU OVA – Institution risk management approach
7.	EU OVB – Disclosure on governance arrangements
8.	EU LI1 – Differences between the accounting scope and the scope of prudential consolidation and mapping of financial statement categories with regulatory risk categories
9.	EU LI2 – Main sources of differences between regulatory exposure amounts and carrying values in financial statements
10.	EU LI3 – Outline of the differences in the scopes of consolidation (entity by entity)
11.	EU LIA – Explanations of differences between accounting and regulatory exposure amounts
12.	EU LIB – Other qualitative information on the scope of application
13.	EU PV1 – Prudent valuation adjustments (PVA)
14.	EU CCA – Main features of regulatory own funds instruments and eligible liabilities instruments
15.	EU CC1 – Composition of regulatory own funds
16.	EU CC2 – reconciliation of regulatory own funds to balance sheet in the audited financial statements
17.	IFRS 9/Article 468-FL - Comparison of institutions' own funds and capital and leverage ratios with and without the application of transitional arrangements for IFRS 9 or analogous ECLs, and with and without the application of the temporary treatment in accordance with Article 468 of the CRR
18.	EU CCyB1 – Geographical distribution of credit exposures relevant for the calculation of the countercyclical buffer
19.	EU CCyB2 – Amount of institution-specific countercyclical capital buffer
20.	EU LR1 – LRSum: Summary reconciliation of accounting assets and leverage ratio exposures
21.	EU LR2 – LRCom: Leverage ratio common disclosure
22.	EU LR3 – LRSpI: Split-up of on balance sheet exposures (excluding derivatives, SFTs and exempted exposures)
23.	EU LRA – Disclosure of LR qualitative information
24.	EU LIQA – Liquidity risk management
25.	EU LIQ1 – Quantitative information of LCR
26.	EU LIQB – Qualitative information on LCR, which complements template EU LIQ1.
27.	EU LIQ2 – Net Stable Funding Ratio
28.	EU CRA – General qualitative information about credit risk
29.	EU CRB – Additional disclosure related to the credit quality of assets
30.	EU CR1 – Performing and non-performing exposures and related provisions
31.	EU CR1-A – Maturity of exposures
32.	EU CR2 – Changes in the stock of non-performing loans and advances
33.	EU CR2a – Changes in the stock of non-performing loans and advances and related net accumulated recoveries
34.	EU CQ1 – Credit quality of forborne exposures
35.	EU CQ2 – Quality of forbearance
36.	EU CQ3 – Credit quality of performing and non-performing exposures by past due days
37.	EU CQ4 – Quality of non-performing exposures by geography
38.	EU CQ5 – Credit quality of loans and advances by industry
39.	EU CQ6 – Collateral valuation - loans and advances
40.	EU CQ7 – Collateral obtained by taking possession and execution processes
41.	EU CQ8 – Collateral obtained by taking possession and execution processes – vintage breakdown
42.	EU CRC – Qualitative disclosure requirements related to CRM techniques
43.	EU CR3 – CRM techniques overview: Disclosure of the use of credit risk mitigation techniques
44.	EU CRD – Qualitative disclosure requirements related to standardised model
45.	EU CR4 – standardised approach – Credit risk exposure and CRM effects
46.	EU CR5 – standardised approach
47.	EU CCRA – Qualitative disclosure related to CCR
48.	EU CCR1 – Analysis of CCR exposure by approach
49.	EU CCR2 – Transactions subject to own funds requirements for CVA risk
50.	EU CCR3 – Standardised approach – CCR exposures by regulatory exposure class and risk weights
51.	EU CCR5 – Composition of collateral for CCR exposures
52.	EU CCR6 – Credit derivatives exposures
53.	EU CCR8 – Exposures to CCPs
54.	EU-SECA – Qualitative disclosure requirements related to securitisation exposures
55.	EU MRA – Qualitative disclosure requirements related to market risk

No.	Table
56.	EU MR1 – Market risk under the standardised approach
57.	EU IRRBBA – Qualitative information on interest rate risks of non-trading book activities
58.	EU IRRBB1 – Interest rate risks of non-trading book activities
59.	EU ORA – Qualitative information on operational risk
60.	EU OR1 – Operational risk own funds requirements and risk-weighted exposure amounts
61.	EU REMA – Remuneration policy
62.	EU REM1 – Remuneration awarded for the financial year
63.	EU REM2 – Special payments to staff whose professional activities have a material impact on institutions' risk profile (identified staff)
64.	EU REM3 – Deferred remuneration
65.	EU REM4 – Remuneration of 1 million EUR or more per year
66.	EU REM5 – Information on remuneration of staff whose professional activities have a material impact on institutions' risk profile (identified staff)
67.	EU AE1 – Encumbered and unencumbered assets
68.	EU AE2 – Collateral received and own debt securities issued
69.	EU AE3 – Sources of encumbrance
70.	EU AE4 – Accompanying narrative information
71.	EU KM2 – Key metrics - MREL and, where applicable, G-SII requirement for own funds and eligible liabilities
72.	Covid19_1 – Information on loans and advances subject to legislative and non-legislative moratoria
73.	Covid19_2 – Breakdown of loans and advances subject to legislative and non-legislative moratoria by residual maturity of moratoria
74.	Covid19_3 – Information on newly originated loans and advances provided under newly applicable public guarantee schemes introduced in response to COVID-19 crisis
75.	Management Board's statement on the liquidity risk

Introduction

Alior Bank SA is obliged, under Part Eight of Regulation (EU) No 575/2013 of the European Parliament and of the Council of June 26, 2013 on prudential requirements for credit institutions and investment firms, amending Regulation (EU) No 648/2012 as amended by (EU) 2019/876 of the European Parliament and of the Council of 20 May 2019 (hereinafter referred to as CRR), **publish information on Pillar III in a publicly available manner.**

Information is published in accordance with Commission Implementing Regulation (EU) 2021/637 of 15 March 2021 laying down implementing technical standards with regard to public disclosure by institutions of information referred to in Part Eight, Titles II and III of the Regulation of the European Parliament and of the Council (EU) No 575/2013, and repealing Commission Implementing Regulation (EU) No 1423/2013, Commission Delegated Regulation (EU) 2015/1555, Commission Implementing Regulation (EU) 2016/200 and Commission Delegated Regulation (EU) 2017/2295, **as well as the EBA / GL / 2020/07 Guidelines of 2 June 2020** on reporting and disclosure of exposures subject to measures **in response to the COVID-19 crisis and Guidelines EBA / GL / 2020/12**, which amend the EBA / GL / 2018/01 guidelines on uniform disclosure, pursuant to Art. 473a of Regulation (EU) No 575/2013, information on the transition period to **mitigate the effects of IFRS 9** and supplemented with provisions resulting from Recommendations M, P and R.

As at 31 December 2021, the **Alior Bank SA Capital Group** was composed of: Alior Bank SA, as the parent company, and subsidiaries in which the Bank holds a majority interests. For the purposes of calculations in the area of capital adequacy, **prudential consolidation was used - in accordance with Article 19** of Regulation (EU) No 575/2013 of the European Parliament and of the Council of June 26, 2013, as amended - **Alior Bank SA and Alior Leasing sp. o. o**

Unless otherwise stated, the information in this document has been disclosed based on the data from the Consolidated Financial Statements of the Alior Bank SA Capital Group for the year ended 31 December 2021. Alior Bank SA exerts a dominant influence on the shape of the risk profile in the Bank's Capital Group, therefore some information contained in the report relates to the individual data of Alior Bank SA.

Figures are drawn up in Polish zlotys (PLN) and are rounded up to one million zlotys (M), with accuracy to one decimal place.

This version of our report is a translation from the original, which was prepared in Polish language. All possible care has been taken to ensure that the translation is an accurate representation of the original. However, in all matters of interpretation of information, views or opinions, the original language version of our report takes precedence over this translation.

Alior Bank SA is part of a financial conglomerate headed by PZU SA, the Bank itself does not calculate additional requirements for the financial conglomerate's own funds.

EU OVC - ICAAP information

Legal basis	Row number	
Article 438(a) CRR	(a)	<p>Alior Bank SA has an internal capital adequacy assessment process (ICAAP) in line with the Regulation of the Minister of Finance, Funds and Regional Policy of 3 August 2021 on the detailed method of internal capital estimation and bank reviews.</p> <p>The purpose of the internal capital adequacy assessment process is to ensure that all risks to which the Bank is exposed are analyzed in terms of materiality and that the Bank has an adequate amount of capital to cover the risks deemed material.</p> <p>The process includes the following phases:</p> <ul style="list-style-type: none">• identification of material risks - performed as part of the process review on an annual basis, or more frequently in justified cases• quantification of individual risks and total internal capital - performed on an ongoing basis• stress testing - performed on an annual basis or more frequently in justified cases• reporting and monitoring of capital goals, including available capital allocation limits - performed periodically• capital management and capital planning - performed on an ongoing basis in order to ensure the adequacy of internal capital• process review - performed on an annual basis, or more often in justified cases.
Article 438(c) CRR	(b)	<p>The Bank did not have any additional regulatory requirements with regard to own funds and their structure based on the supervisory review process referred to in Art. 104 sec. 1 lit. a) Directive 2013/36/EU.</p>

EU OVA - Institution risk management approach

Legal basis	Row number
Point (f) of Article 435(1) CRR	(a) <p>As part of the risk appetite, the Bank's Management Board approved the expected levels of the Bank's key capital ratios for 2021 at the level of: total capital ratio - 10.50% and Tier 1 ratio - 8.50%. Lower risk appetite levels for the ratios than before related to the signing by the Minister of Finance of the ordinance on the solution of the systemic risk buffer on 18 March 2020. The expected internal capital coverage ratio by own funds was approved at 1.10%.</p> <p>The Bank is still not identified as a systemically important institution, therefore there is no O-SII buffer. The structure of the size of the assessed risk exposure, measured by the capital requirement measure for individual risk types, throughout 2021 was consistent with the structure of risk exposure in the entire banking sector in Poland.</p> <p>The structure of the size of the assessed risk exposure confirms the dominance of credit risk exposure in the total risk exposure. In line with its policy, the Bank does not maintain a significant exposure to market risk, and therefore the share of risk in the exposure structure is small. The share of exposure to operational risk measured with the AMA and TSA models (for the branch in Romania and for Alior Leasing) was close to the average share for the banking sector in Poland.</p>
Point (b) of Article 435(1) CRR	(b) <p>In order to efficiently and effectively manage the risk system at Alior Bank SA, the supervision, control and responsibility for the operation of this system have been entrusted to:</p> <ul style="list-style-type: none">• Supervisory Board,• the Risk Committee of the Supervisory Board,• the Bank's Management Board,• Committees (Capital, Assets and Liabilities Management Committee - CALCO, Operational Risk Committee, Credit Risk Committee and Business Initiatives Committee, Model Risk Committee, Bank Credit Committee),• Organizational units responsible for particular types of risk,• the Internal Audit Department. <p>The risk management system in place at the Bank is based on three independent lines of defense. Its framework is set by standards applicable in the banking sector and guidelines contained in regulations, including supervisory recommendations, which are reflected in the applicable internal regulations.</p> <p>The Supervisory Board oversees the Group's risk management system, the compliance of the Group's risk-taking policy with the Group's strategy and financial plan, and assesses the adequacy and effectiveness of this system, in particular through:</p> <ul style="list-style-type: none">• approval of the strategy and risk appetite defined by the Bank's Management Board for a given year and monitoring of its compliance,• approval of the risk management strategy adopted by the Bank's Management Board and monitoring of its compliance,• supervision over the development, adoption and implementation of policies and procedures on the basis of which the risk management system is to function in the Group,• defining the rules for reporting to the Supervisory Board on the types and size of risk in the activity in a way that allows the supervision of the risk management system in the Group,• annual assessment of the adequacy and effectiveness of the risk management system.

EU OVA - Institution risk management approach

Legal basis	Row
Point (b) of Article	(b)
435(1) CRR	<p>The Risk Committee of the Supervisory Board supports the Supervisory Board in supervision over the Group's risk management system. The Committee operates based on the Rules of Procedure of the Risk Committee of the Supervisory Board of Alior Bank approved by the Supervisory Board. the most important tasks of the Risk Committee of the Supervisory Board include in particular:</p> <ul style="list-style-type: none"> • giving opinions on the Bank's overall, current and future risk appetite, which has been quantified in the risk appetite, • giving opinions on the Bank's risk management strategy and analyzing the information submitted by the Management Board regarding the implementation of this strategy, including periodic reports on capital adequacy, credit, operational, market and liquidity risk, as well as model risk, compliance risk and reputation risk, • supporting the Supervisory Board in overseeing the implementation of the Bank's risk management strategy, • verification of compliance of the price of liabilities and assets offered to clients with the Bank's business model and its risk strategy, and in the event of non-compliance, presenting to the Bank's Management Board proposals to ensure the adequacy of the prices of liabilities and assets to these types of risk, • issuing opinions on regulations specifying the Bank's strategy and policy, regulating the approach to risk taking, and the approval of which lies within the competence of the Supervisory Board, • analysis of periodic reports on the implementation of the above strategies and policies, • supporting the Supervisory Board in the ongoing monitoring of the Bank's risk management system. <p>In 2021, 15 regular meetings of the Risk Committee of the Supervisory Board were held, including 4 combined meetings of the Risk Committee of the Supervisory Board and the Audit Committee of the Supervisory Board.</p> <p>The Management Board of the Bank designs, implements and ensures the operation of a coherent risk management system in the Group, adjusted to the risk profile, including the rules for managing individual risk types of the Group, ensuring their consistency with the Group's risk management strategy, and determining the risk appetite. defines the organizational structure of the Bank, including foreign branches, ensuring the proper division of key roles from the point of view of risk management.</p> <p>The Management Board is supported in effective management of individual types of risk by committees established for this purpose. The committees take decisions / issue recommendations at stationary meetings or by circulation.</p> <p>The purpose of the CALCO Committee is to support the Bank's Management Board in the effective management of market risk, liquidity risk, counterparty risk, business risk, capital risk and excessive leverage risk, as well as supervision over the operation of the Repair Plan. In 2021, the CALCO Committee held 52 meetings.</p> <p>The Operational Risk Committee was established to support the Management Board in effective management of operational risk in the Bank. The Committee monitors the level of exposure to operational risk and assesses the situation with regard to operational risk for the entire Bank. In 2021, the Operational Risk Committee held 15 meetings.</p> <p>The purpose of the Credit Risk Committee and Business Initiatives is to support the Bank's Management Board in effective management of the Bank's credit risk, including the credit concentration risk. In 2021, the Credit Risk and Business Initiatives Committee held 12 meetings.</p> <p>The Model Risk Committee supports the Bank's Management Board in the effective management of model risk. In 2021, the Model Risk Committee held 10 meetings.</p> <p>The activity of the Bank's Credit Committee is to approve credit decisions on the Bank's on-balance-sheet and off-balance sheet exposure, to make decisions on the introduction of special offers and to make decisions in all matters not regulated in the Rules of Credit Competence, related to the Bank's taking credit risk, up to the amount granted competence limit. In 2021, the Bank's Credit Committee held 125 meetings.</p>

EU OVA - Institution risk management approach

Legal basis	Row number	
Point (b) of Article 435(1) CRR	(b)	<p>The Bank supervises the functioning of the subsidiaries of the Bank's Capital Group. The Bank supervises the risk management systems in these entities and takes into account the level of risk related to the activities of individual entities as part of the risk monitoring and reporting system at the level of the Bank's Group.</p> <p>The Risk Materiality Group is responsible for the risk review at Alior Bank SA. The Group is composed of representatives of individual divisions and areas of the Bank's operations, having appropriate knowledge of the current and potential risk. In particular, they are representatives of units responsible for managing credit risk, market risk and operational risk.</p> <p>Due to the variety of phenomena accompanying particular types of risk, each of them is managed by the appropriate leading unit. In the case of credit risk, individual functions related to identification, measurement, assessment and monitoring have been divided among several organizational units.</p> <p>The detailed scope of tasks of individual units is presented when discussing each type of risk.</p> <p>The Internal Audit Department carries out independent audits aimed at providing the Supervisory Board and the Management Board of the Bank with objective information, including the assessment of the effectiveness and adequacy of the risk management system in the Bank's Group.</p>
Point (e) of Article 435(1) CRR	(c)	<p>The implemented and applied risk management system in the Group is appropriate from the point of view of the Group's profile and strategy.</p>
Point (c) of Article 435(1) CRR	(d)	<p>Risk measurement and assessment includes the determination of risk measures adequate to the materiality of a given type of risk and risk quantification using the established measures, as well as risk assessment consisting in determining the level of risk that may pose a threat to the achievement of the Group's strategic goals. As part of the risk measurement, stress tests are carried out on the basis of assumptions ensuring reliable risk assessment, which include an analysis of the impact of changes in the environment and functioning of the Group on its financial and capital position. The measurement results are regularly reported to the Bank's authorities and designated organizational units.</p>
Point (c) of Article 435(1) CRR	(e)	<p>Risk reporting consists in regularly providing the Supervisory Board, the Management Board, committees and organizational units of the Bank indicated by the Management Board with reliable and regular information on changes in the size and profile of the Group's risk, as well as on the undertaken and recommended actions in the field of risk management. The scope, frequency and form of reporting are adjusted to the management level of the recipients, which is regulated in detail in the Bank's internal regulations.</p>
Point (a) of Article 435(1) CRR	(f)	<p>Credit risk</p> <p>Credit risk management and keeping it at a safe level, defined in the risk appetite, is of fundamental importance for the Bank's stable operation and development. Credit risk is controlled by the credit risk management system in place at the Bank, which is comprehensive and integrated with the Bank's operational processes.</p> <p>The description of the risk control system operation is reflected in the regulations in force at the Bank, in particular in the lending methodologies and risk valuation models tailored to the client's segment, product and transaction type, rules for establishing and monitoring legal loan collateral, and monitoring and debt collection processes.</p> <p>By managing the risk (both on an individual and portfolio basis), the bank takes actions that lead to:</p> <ul style="list-style-type: none"> • minimizing the level of credit risk of a single loan with the assumed profitability level • reduction of the total credit risk resulting from the Bank's specific loan portfolio. <p>As part of minimizing the risk of a single exposure, the Bank assesses each time when granting a loan product:</p> <ul style="list-style-type: none"> • credibility and creditworthiness of the client, taking into account, inter alia, detailed analysis of the source of exposure repayment, • credibility of the accepted collateral, including verification of their formal, legal and economic status, taking into account, inter alia, LTV adequacy, • undertakes effective monitoring and debt collection activities adequately defined at the level of a single client thanks to the segmentation models used.

EU OVA - Institution risk management approach

Legal basis	Row number
Point (a) of Article 435(1) CRR	(f)
	<p>In order to maintain the credit risk at the level defined in the risk appetite, the Bank takes the following actions:</p> <ul style="list-style-type: none">• sets and controls concentration limits,• monitors the structure and quality of a new credit exposure in relation to the defined objectives and signals of EWS,• analyzes changes in internal and market factors as well as the sensitivity of the loan portfolio, in particular with regard to negative events identified as potential risk,• regularly monitors the loan portfolio, controlling all significant parameters of credit risk (including PD, LGD, LTV, DTI, COR, NPE, NPL, Coverage, loss ratio for each generation),• regularly carries out stress tests. <p>In addition to individual organizational units in the credit risk management process, an active role is played by the Supervisory Board, the Bank's Management Board, the Credit Risk Committee and Business Initiatives Committee and the Bank's Credit Committee.</p> <p>Operational risk</p> <p>The Bank has a formalized operational risk management system under which it counteracts the occurrence of operational events and limits losses in the event of risk materialization.</p> <p>Operational risk management includes identification, measurement and assessment of operational risk, management activities as well as risk monitoring and control at all levels, from organizational units responsible for operational risk management in their areas, operational risk coordinators, through the Operational Risk Management Department, the Operational Risk Committee, to Management and Supervisory Board.</p> <p>As part of identifying operational risk, the Bank recognizes risk factors that materially affect its level. At the identification stage, various methods of obtaining information are used, including:</p> <ul style="list-style-type: none">• collecting data on events and losses at the Bank and its subsidiaries,• risk identification in processes, products and systems,• risk identification in outsourced processes,• analysis of external operational risk events. <p>Measurement and assessment of operational risk are carried out with the use of quantitative and qualitative measures and include, among others:</p> <ul style="list-style-type: none">• key risk indicators (KRI) for which tolerance thresholds have been defined,• purpose and limits as well as determining the level of their use,• The Bank calculates the own funds requirement for operational risk in accordance with the Advanced Approach (AMA) for the Bank, excluding the Branch in Romania, for which the Standardized Approach (TSA) applies,• estimating internal capital for the Bank for operational risk using the results of the AMA model,• stress tests and scenario analyzes,• self-assessment of operational risk,• assessment of new and modified business processes, products and submissions.

EU OVA - Institution risk management approach

Legal basis	Row number
Points (a) and (d) of Article 435(1) CRR	(g)
Market risk	
The following types of market risk have been identified in the Bank and are subject to management:	
<ul style="list-style-type: none">• interest rate risk in the banking book,• market risk in the trading book (including interest rate risk in the trading book, currency risk and commodity price risk).	
The objective of market risk management is to limit potential losses due to changes in market risk factors to an acceptable level by appropriately shaping the structure of the balance sheet and off-balance sheet items.	
The Bank distinguishes the following market risk factors:	
<ul style="list-style-type: none">• exchange rates,• interest rate indices,• stock / index prices,• prices of goods,• credit spread related to the rating of a given issuer,• options volatility parameters.	
The Bank has a clear division of competences in the area of market risk management, including:	
<ul style="list-style-type: none">• concluding treasury transactions,• measurement, monitoring and reporting of market risk,• transaction settlement process,• operational service and operational support for business processes.	
Supervision over the above-mentioned activities related to concluding transactions as well as independent measurement and reporting of risk at the Bank has been distributed to the level of a Management Board Member, which guarantees full independence of their operations.	
Supervision over the above-mentioned activities related to concluding transactions as well as independent measurement and reporting of risk at the Bank has been distributed to the level of a Management Board Member, which guarantees full independence of their operations.	
Credit risk	
Collaterals are established in relation to the credit risk incurred by the Bank and in a flexible manner to the client's abilities. Its establishment does not release the Bank from the obligation to examine the customer's creditworthiness.	
The purpose of securing the loan is to provide the Bank with the repayment of the granted loan together with the interest and costs due, if the borrower fails to pay the amounts due within the time limits specified in the loan agreement and the restructuring activities do not bring the expected results.	
Details in points b and c of EU CRC - Qualitative disclosure requirements on CRM techniques	
Operational risk	
The Bank, striving to reduce the risk of materialization of the effects of rare but potentially severe operational events, purchased a number of insurance policies. Above the policies covered, inter alia, insurance in the field of: property (including electronic equipment), civil liability, penal fiscal liability and professional liability. The terms of individual policies are adjusted to the scale and scope of the risk incurred. Above policies are not used as a mechanism to limit the amount of own funds requirements for operational risk, nor as a mitigating factor for the amount of internal capital for operational risk.	
An important element of operational risk management at Alior Bank is business continuity management (BCM). As part of BCM, the Bank implements the BCM system and strategies in accordance with the Business Continuity Management Policy approved by the Bank's Management Board. As part of the BCM Bank system, periodically:	
<ul style="list-style-type: none">• analyzes business processes / operational activities,• performs a review and update of the strategy of action in emergency and crisis situations,• develops and implements emergency solutions and Business Continuity Plans (BCP),• performs tests, updates and self-assessment of the BCM system,• builds awareness in the organization in the field of BCM.	
The implementation of the agreed system and BCM strategy is to ensure the implementation of critical business processes in the event of an unplanned disruption.	
The Bank has cyclically tested emergency solutions for the implementation of critical processes (including replacement locations) and disaster recovery solutions.	

EU OVA - Institution risk management approach

Legal basis	Row number	
Points (a) and (d) of Article 435(1) CRR	(g)	<p>Market risk</p> <p>Market risk is limited by a system of limits and warning thresholds as well as an appropriate number of regulations defining the framework of the Bank's operations in terms of exposure to market risk. The limits are defined in particular in the form of the market risk appetite at the level of the Bank's Supervisory Board. Moreover, the CALCO Committee additionally limits the market risk with supplementary limits.</p> <p>Market risk is hedged by appropriate shaping of the Bank's balance sheet structure (natural hedge) and by concluding appropriate hedging transactions. Some of the hedging transactions are designated for hedge accounting, both for cash flow volatility and fair value volatility.</p>

EU OVB - Disclosure on governance arrangements

Legal basis	Row number	
Point (a) of Article 435(2) CRR	(a)	<p>As at 31.12.2021, members of the Management Board of Alior Bank S.A. they performed 7 functions in management boards and 3 functions in supervisory boards. The data includes the function in the Bank's Management Board and treats functions within the Alior Bank SA Group as one function.</p>
Point (b) of Article 435(2) CRR	(b)	<p>Alior Bank Spółka Akcyjna applies the Policy of selection and evaluation of members of the Management Board and Supervisory Board, taking into account, inter alia, the provisions of the Methodology for assessing the suitability of bodies supervised by the Polish Financial Supervision Authority. that the functions of the members of the Management Board are performed by persons with knowledge, skills and experience appropriate to the functions they perform and the duties entrusted to them, and that they guarantee the proper performance of these duties.</p> <p>In order to ensure the individual suitability of the members of the Management Board, the Appointment and Remuneration Committee of the Supervisory Board and then the Supervisory Board assess the initial suitability of the candidates and, based on this assessment, make a decision on appointment to the Management Board. The collective suitability of the body is also assessed.</p> <p>The Appointment and Remuneration Committee of the Supervisory Board and the Supervisory Board periodically verify the suitability of the members of the Management Board by performing a secondary assessment of the individual suitability of individual members of the Management Board and the collective suitability of the Management Board.</p>
Point (c) of Article 435(2) CRR	(c)	<p>The Bank makes efforts to ensure the diversity of the Management Board, in particular in terms of education and professional experience, gender and age of the Management Board members, to the extent that ensures a broad spectrum of views of the management body.</p> <p>In order to ensure diversity as far as possible, the selection of members of the Management Board should take into account candidates of different education, work experience, age and gender. In particular, the Nominating Committee ensures that women are involved in the process of selecting members of the Management Board and that candidates are treated equally, irrespective of their gender.</p> <p>When assessing the diversity of members of the Management Board in terms of their education and professional experience, the following criteria may be taken into account in particular: the place (country, region) of obtaining education or work experience, education profile, field of study, specialization in a specific field, type of entities in which the candidate performed the function or remained employed or length of service.</p>
Point (d) of Article 435(2) CRR	(d)	<p>The Risk Committee of the Supervisory Board of Alior Bank S.A. was established on 22 December 2015 by Resolution No. 81/2015 of the Supervisory Board to support the Supervisory Board in overseeing the risk management process at the Bank.</p> <p>The Committee operates based on the Rules of Operation of the Risk Committee of the Supervisory Board of Alior Bank approved by the Supervisory Board.</p> <p>Meetings of the Committee are held in accordance with the work plan adopted by the Committee, with a monthly frequency.</p>
Point (e) Article 435(2) CRR	(e)	<p>Reporting to the management body is carried out in accordance with the principles described in the Regulation of the Management Information System (approved at the level of the Bank's Management Board).</p> <p>Management reporting is carried out in the following cycles:</p> <p>Monthly:</p> <ul style="list-style-type: none"> • The monthly information for the Bank's Management Board is to present to the Bank's Management Board the aggregated results of the implementation of the Bank's strategy in terms of individual risks in relation to the adopted risk appetite • The implementation of key risk indicators, including the risk appetite in the credit portfolio of the Alior Bank Group, is the presentation to the Management Board of the Bank and the Risk Committee of the Supervisory Board of the aggregated results of the implementation of the Bank's strategy for individual risks in relation to the adopted risk appetite.

Detailed information on the structure of the Alior Bank SA Capital Group is included in the Consolidated Financial Statements of the Alior Bank Group for the year ended 31 December 2021.

EU LIA - Explanations of differences between accounting and regulatory exposure amounts

Legal basis	Row number	
Article 436(b) CRR	(a)	<p>The scope of companies subject to prudential consolidation differs from the scope of companies subject to financial consolidation carried out in accordance with the International Financial Reporting Standards. In 2021, Alior Bank SA and Alior Leasing sp.z o.o. were covered by prudential consolidation. In the opinion of the Bank's Management Board, other subsidiaries were not subject to prudential consolidation due to their insignificant scale of operations in the Bank's Capital Group.</p> <p>The differences between the accounting and prudential scope of consolidation result from the financial data of other companies not included in the prudential consolidation, and from accounting consolidation exclusions.</p>
Article 436(d) CRR	(b)	<p>The main difference between the accounting and prudential scope of consolidation is "Investments in associates", the Bank's shares in subsidiaries not prudentially consolidated.</p>

EU LIB - Other qualitative information on the scope of application

Legal basis	Row number	
Article 436(f) CRR	(a)	In the case of other entities belonging to the Alior Bank SA Capital Group, the Bank does not identify any significant obstacles to the transfer of funds for recapitalization of entities and the repayment of their liabilities.
Article 436(g) CRR	(b)	The Bank does not have subsidiaries not covered by consolidation, whose own funds are lower than required.
Article 436(h) CRR	(c)	The Bank does not apply the derogations referred to in Art. 7 of CRR, or the individual consolidation method specified in Art. 9 of CRR.
Article 436(g) CRR	(d)	Due to the above, this disclosure does not apply to the Alior Bank Group.

Total equity		5 919,2	5 671,4			

The amount of deduction from own funds for the item Intangible assets, point 1 letter b) of the above table, was decreased by PLN 102.3 M. This adjustment represents the value of a carefully valued software intangible asset, which was determined by the Bank in accordance with Commission Delegated Regulation (EU) 2020/2176 of 12 November 2020 amending Delegated Regulation (EU) No 241/2014 with regard to the deduction of software assets from Common Equity Tier 1 items. The above adjustment was taken into account by the Bank in the calculation of capital requirements for credit risk.

IFRS 9/Article 468-FL - Comparison of institutions' own funds and capital and leverage ratios with and without the application of transitional arrangements for IFRS 9 or analogous ECLs, and with and without the application of the temporary treatment in accordance with Article 468 of the CRR

PLN m		31.12.2021	31.12.2020
Available capital (amounts)			
1	CET1 capital	6 200,0	6 545,2

Point (d) of Article 451(1) CRR	(a)
	<p>In its operations, the Bank applies procedures for managing the risk of excessive financial leverage. These procedures define:</p> <ul style="list-style-type: none">• the method of measuring the leverage ratio as a measure of Tier 1 capital divided by the total exposure,• frequency of calculating the leverage ratio,• responsibility for calculating the leverage ratio,• limits for the risk of excessive financial leverage,• responsibility for managing the risk of excessive leverage.
Point (e) of Article 451(1) CRR	(b)
	<p>The leverage ratio is at a satisfactory level. The Bank identified factors that had an impact on its level, including:</p> <ul style="list-style-type: none">• an increase in the balance sheet total,• a decrease in Tier 1 capital mainly as a result of the settlement of the next part of IFRS9's impact in 2021.

EU LIQA - Liquidity risk management

Legal basis	Row number	
Article 451a(4) CRR	(a)	<p>The liquidity risk means a risk of failure by the Bank to meet – subject to comfortable conditions and at adequate prices – its payment obligations resulting from the Bank's on- and off-balance sheet items. As part of the liquidity risk, the financing risk is distinguished, which is the risk of losing the financing sources and the risk of the lack of the required renewed funding or access denial to new sources of financing.</p> <p>Strategies and processes for liquidity risk management, including policies for diversifying the sources and maturity of planned funding</p> <p>Liquidity risk management in the Bank consists in ensuring and maintaining the Bank's ability to meet both current and future liabilities, while minimizing the costs of obtaining liquidity.</p> <p>The Bank has a liquidity adequacy assessment process (ILAAP) which comprehensively assesses the adequacy of liquidity risk management and its adjustment to the nature, scale and complexity of the Alior Bank Group.</p> <p>This process accomplishes the following goals:</p> <ul style="list-style-type: none">• ensuring its ability to pay all its obligations when they fall due also in an extreme situation,• maintaining at an adequate level a liquidity buffer that means high quality liquid assets ensuring adequate excess liquidity,• determination of the scale of the Bank's exposure to liquidity risk by setting internal liquidity limits, consistent with the appetite and strategy of the Bank, taking into account the results of stress tests• minimising the risk of trespassing on the liquidity limits defined at the Bank,• monitoring the Bank's liquidity condition regarding the occurrence of an emergency situation in order to launch the Liquidity Maintenance Plan and the Recovery Plan,• ensuring compliance of the processes functioning at the Bank with regulatory requirements concerning liquidity risk management. <p>Strategies and processes for liquidity risk management, including the above objectives, are carried out independently by relevant organizational units, whose competences and responsibilities are clearly defined in internal regulations.</p> <p>As part of ILAAP Bank:</p> <ul style="list-style-type: none">• identifies risks and significant risk factors,• measures and reports liquidity risk,• works with liquidity procedures and policies, including a financing plan for the subsequent years of the Bank's operations,• manages Liquidity Contingency Plans and Recovery Plan,• maintains a liquidity buffer consisting of high-quality liquid assets,• develops a system of liquidity limits in line with the risk appetite, monitors liquidity limits and early warning indicators identifying negative trends that may have an impact on the increase of liquidity risk,• conducts liquidity risk stress tests, on the basis of which it assesses the extent to which the Bank is prepared to settle liabilities in a stress situation,• includes in the fund transfer rates system adjustments supporting liquidity risk management,• develops liquidity procedures and policies, including a financing plan for the next years of the Group's operations. The developed financing plan takes into account, among others, the scope of obtaining loans and deposits on the interbank market, taking into account their term and currency structure, the Group's plans to obtain and maintain stable external funds, the availability of refinancing instruments and an appropriate degree of diversification of the Group's liabilities.

EU LIQA - Liquidity risk management

Legal basis	Row number
Article 451a(4) CRR	(b)
The structure and organization of the liquidity risk management function (body, articles of association, other arrangements)	
<p>For the purpose of managing assets and liabilities, the Capital, Asset and Liability Management Committee (CALCO) was established. The liquidity risk strategy, including the acceptable risk level, the assumed structure of the balance sheet and the financing plan, is approved by the Bank's Management Board and then approved by the Bank's Supervisory Board. The Treasury Department is responsible for concluding interbank transactions, accounting and settlement of transactions is carried out in the Operations Division, while liquidity risk is monitored and measured in the Financial Risk Management Department. The division of competences in the area of liquidity risk management is clear and ensures separation to the level of a Management Board Member, which guarantees full independence of their operations. In 2021, the Bank had a foreign branch in Romania. This branch conducts deposit and credit activities as part of financing obtained from Alior Bank SA and from funds obtained from the local market. The level of the Branch's liquidity is monitored on an ongoing basis by dedicated organizational units within the Branch and the Bank's Head Office.</p>	
Article 451a(4) CRR	(c)
Description of the degree of centralization of liquidity management and interactions between group entities	
<p>In 2021, in accordance with the provisions of the internal regulations regarding liquidity risk, the Bank had one company significant from the point of view of managing the Group's liquidity risk, which was a subsidiary of Alior Leasing. The liquidity risk in the company is monitored, controlled and reported. Alior Leasing has internal rules of liquidity risk management developed in consultation with Alior Bank, according to which, inter alia, determines the appetite for liquidity risk, liquidity contingency plans and prepares periodic reports. Reports on the company's liquidity risk prepared by Alior Leasing constitute, in particular, the starting point for making decisions regarding the company's liquidity risk management and are used to consolidate the liquidity risk at the level of the Alior Bank SA Group.</p>	
Article 451a(4) CRR	(d)
Scope and nature of liquidity risk reporting and measurement systems	
<p>The measurement of liquidity risk at the Bank is performed by the Financial Risk Management Department in a manner completely independent of the units responsible for concluding transactions. The purpose of risk measurement is to present the impact of all significant factors on the Bank's ability to maintain an adequate level of liquidity. Apart from the collective measures of liquidity risk, the analysis covers also particular categories and factors influencing the current or potential future liquidity level of the Bank. The measurement of the liquidity risk covers the Polish currency and all foreign currencies significant from the point of view of the liquidity risk in which the Bank conducts its operating activities are performed taking into account all material items, both on-balance and off-balance sheet (including in particular derivative instruments).</p>	
<p>Among the liquidity management measures used, the Bank distinguishes between ratios and related limits of the following types of liquidity:</p> <ul style="list-style-type: none">• intraday liquidity, defined as the ability to meet all monetary obligations on the current day,• current liquidity understood as the ability to finance assets and settle liabilities in a timely manner in the course of the Bank's normal operations or in other conditions that can be predicted without the necessity to incur a loss within the next 7 days,• short-term liquidity, defined as the ability to meet all monetary obligations within 30 consecutive days,• medium-term liquidity is understood as the ability to meet all liabilities with maturity over 1 and up to 12 months,• long-term liquidity is the monitoring of the ability to meet all monetary obligations with maturity over 12 months.	

EU LIQA - Liquidity risk management

Legal basis	Row number
Article 451a(4) CRR	(d)

The management of the intraday, current and short-term liquidity risk covers events that will affect the Bank's liquidity in the period from 1 day to 1 month. The Interbank Transactions Department is responsible for the management of intraday, current and short-term liquidity, and the Financial Risk Management Department, using daily reports, supervises and monitors the management process. The Financial Risk Management Department is responsible for the control and monitoring of medium and long-term liquidity, which prepares monthly reports discussed at CALCO Committee meetings, presented to the Bank's Management Board and quarterly reports presented to the Supervisory Board.

The Alior Bank Group uses a number of indicators and analyzes to measure and analyze the liquidity risk, including:

- calculation and monitoring of LCR, NSFR supervisory indicators - assessment of the Bank's compliance with quantitative supervisory requirements,
- forecasts for the development of supervisory liquidity measures - ensuring that the Bank will meet quantitative supervisory requirements in the future,
- calculation and monitoring of internal liquidity ratios, including measures of intraday, current, short-term, medium and long-term liquidity, basic surplus and total liquidity buffer,
- liquidity gap - allows to estimate the size of the mismatch (difference) between on-balance sheet and off-balance sheet assets and liabilities for each maturity / maturity band (period gap), as well as for the sum of assets and liabilities jointly in all maturity / maturity bands (cumulative gap). The bank determines the contractual and adjusted liquidity gap. The realignment of flows takes place as a result of applying adjustment weights to contractual flows in order to determine the most probable (economic) maturity date. Realization of values and dates is used both for balance sheet items and off-balance sheet items, e.g. such as: assets for which earlier disposal is possible, positions without contractual maturities, banking products where the analysis of customer trends and behavior indicates differences between the contractual maturity and the actual maturity, off-balance sheet liabilities due to credit lines granted and warranty
- stability analysis of stable external funds - determining on the basis of historical data what part of these liabilities is stable and may, with a high probability, constitute a stable source of financing under normal market conditions,
- analysis of renewal / breaking of deposits - the purpose is to verify the behavioral stability of customer behavior, which is the basis for determining the sediment and weights of cash flow realities in the Group,
- analysis of the stability of receivables due to off-balance sheet commitments granted - determination of the level of use of guarantee and credit lines by customers, deposit and weights of cash flow realities in the Bank,
- analysis of stable external funds concentration - indication of the potential risk of excessive dependence of the Bank on financing sources characterized by an insufficient degree of diversification, which could have a negative impact on the stability of external funds,
- long-term liquidity analysis - aimed at determining the risk associated with financing long-term loans (mainly secured by a mortgage or for financing large projects not related to real estate, including industrial investments) with liabilities with shorter maturities,
- analysis of the concentration of liquid assets - aimed at limiting the risk of obtaining cash by liquidating the above-mentioned assets when it is necessary to cover the expected as well as unexpected liabilities of the Bank.

EU LIQA - Liquidity risk management

Legal basis	Row number
Article 451a(4) CRR	(e)
Policies for hedging and limiting liquidity risk, as well as strategies and processes for monitoring the continued effectiveness of hedging instruments and risk mitigants	
<p>The Bank's liquidity risk hedging strategy consists in:</p> <ul style="list-style-type: none">• shaping an appropriate structure of financing sources,• limiting the concentration risk by diversifying the structure of the deposit base broken down into retail, business, financial, government and local government institutions,• maintaining excess liquidity at an adequate level in the form of the most liquid securities,• increasing the availability of alternative sources of financing.	
<p>The Alior Bank Group regularly monitors and reports the level of liquidity risk measures and the degree of utilization of internal limits and threshold values. Liquidity risk reports are prepared on a daily, weekly, monthly, quarterly and annual basis. Their frequency and scope as well as the list of recipients (including CALCO, the Bank's Management Board and the Supervisory Board) are regulated in the internal regulations of the Group.</p> <p>The limits set the boundaries of the Group's operations that must not be exceeded. The Group extends the selected limits by warning thresholds, the function of which is to protect against exceeding internal limits by specifying the level of limit utilization (minimum surplus), the achievement of which will mean an increased liquidity risk and a real risk of exceeding the limit within a specified period of time.</p>	
Article 451a(4) CRR	(f)
Outline of the Bank's contingency financing plans	
<p>In the event of a liquidity crisis, understood as a hypothetical risk and the real occurrence of a situation in which it will not be possible to timely meet current or anticipated future payment obligations, liquidity contingency plans have been developed to identify solutions to survive the liquidity crisis, including corrective actions. The liquidity situation is monitored on an ongoing basis in terms of identifying a threat situation by defining and monitoring a wide range of indications regarding the situation within the Group, as well as the market and macroeconomic environment, which are used to identify situations of increased liquidity risk, high liquidity risk and liquidity risk crisis and enable taking appropriate action, as specified in the contingency plans. Contingency plans are reviewed and tested at least once a year or when changes in market conditions so require. As part of the tests of contingency plans, the following are determined: the feasibility and feasibility of actions, the decision-making process, the competences of individual units, the amount of funds that can be obtained and the time necessary to implement the actions.</p>	
Article 451a(4) CRR	(g)
Clarification of how to apply stress tests	
<p>Stress testing is an essential component of liquidity risk management. The core part of stress testing is scenario analysis, which examines the impact on the liquidity of a given scenario taking into account different risk factors and different levels of severity of individual risk factors (while maintaining the overarching principle of a conservative approach in constructing scenarios). Additionally, separate scenarios for intraday liquidity are carried out. The scenario tests are supplemented with sensitivity analyzes, where only selected risk factors are tested which, in the Group's opinion, have the greatest impact on the liquidity situation, and reverse tests, where it is tested what level of the most important risk factors leads to the loss of liquidity. Reverse tests are performed by analyzing two aspects: loss of liquidity meaning the inability to settle liabilities and a decrease in liquidity resulting in a failure to meet supervisory liquidity requirements. The results of the stress tests are accepted by CALCO, the Bank's Management Board and the Supervisory Board.</p>	

EU LIQA - Liquidity risk management

Legal basis	Row number
-------------	------------

The stress test scenarios adopted by the Bank's Management Board are developed in three basic variants, for which at least two scenarios are constructed:

- internal crisis - a situation where internal-bank factors or other factors are responsible for liquidity problems, but only for the Bank (2 scenarios assuming loss of reputation),
- systemic crisis - a situation where in the whole or a significant part of the banking system there are problems with maintaining liquidity due to the economic or financial crisis (2 scenarios, including 1 related to the COVID-19 pandemic),
- a combination of an internal crisis and a systemic crisis - a situation which is a combination of elements from the two above variants (2 scenarios assuming simultaneous problems of the Bank and the entire sector).

The results of the stress tests are used in particular to assess the preparedness to settle liabilities in a stress situation, to assess the adequacy of excess liquidity by comparing the held liquidity buffer with the required liquidity buffer in a stress situation and to verify the adjustment of the Group's liquidity profile to the adopted liquidity risk tolerance by checking, whether the survival horizon in each scenario is at least equal to the originally assumed one, The comparison of the demand for liquid funds for each scenario with the values that can be obtained on the basis of the tests of contingency plans allows to check whether the Group is able to settle liabilities in longer horizons (beyond the survival horizon) using emergency actions. In addition, the results of stress tests are used to set internal limits, adjust and improve internal regulations, everyday practice of liquidity risk management by using the results of stress tests for the ongoing assessment of the liquidity situation, shaping the liquidity contingency plan.

Article 451a(4) CRR	(h)	Information provided in this Report in the STATEMENT section
---------------------	-----	--

Article 451a(4) CRR	(i)	Information provided in this Report in the STATEMENT section
---------------------	-----	--

Recommendation P		
------------------	--	--

According to the guidelines set out in Recommendation P, the Bank maintains a high level of liquidity buffer consisting of unencumbered high-quality liquid assets by investing in debt securities of the government and companies with the highest ratings, characterized by the possibility of rapid liquidation, keeping funds in the current account with the NBP and other banks (nostro accounts), keeping cash in the Bank's cash desks and depositing funds in interbank deposits, within the set limits. The adequacy of the maintained liquidity buffer level is controlled by comparing it with the designated minimum amount of the liquidity buffer necessary to survive the stress scenario in a time horizon of up to 7 days and 30 days. As at 31 December 2021, the total liquidity buffer amounted to PLN 17 443 M against the minimum level of PLN 14 718 M resulting from the shock scenario. When calculating the amount of the liquidity buffer, the Bank applies appropriate reductions of individual components of this buffer in order to take into account the market (product) liquidity risk.

The Bank uses a number of methods for assessing the situation in the liquidity area, including, inter alia, monitoring (in value brackets as at the end of 2021):

- the ratio of the deposit base and own issues to net loans (1.23%),
- stability of the deposit base (95.5%), including cancellations of deposits (0.8%),
- balance sheet and off-balance sheet liquidity gap.

The Bank carries out a gap analysis based on real cash flows, taking into account, inter alia, the following assumptions:

- stability of liabilities with undefined maturities (e.g. current accounts, deposit renewals),
- the possibility of extending the maturity of certain asset items (e.g. not taking into account inflows from non-performing loans),
- the ability to sell an asset (liquidity portfolio).

In addition, when determining the adjusted liquidity gap, the Bank uses model weights of the deposit sludge and the use of off-balance sheet liabilities, determined on the basis of the implemented statistical model and historical observations of balances for individual products.

Analysis of maturity / payment of assets and liabilities for the Alior Bank Group, according to the dates real to the end of 2021.

EU LIQB on qualitative information on LCR, which complements template EU LIQ1.

Legal basis	Row number	
Article 451a(2) CRR	(a)	<p>Explanation of the main factors affecting the LCR results and changes in the share of input data in the LCR calculation over time.</p> <p>The LCR is understood as the ratio of the value of liquid assets to net cash outflows resulting from both contractual and stress-modeled exposures over a 30-day time horizon.</p> <p>The main factors influencing the level of the LCR ratio are: safe level of maintained liquid assets, stable base of retail deposits, low dependence on short-term financing with deposits of financial entities, the level of issued bonds, taking into account their maturity, the balance of loans granted and the amount of lending conducted by the Group, and the amount of granted off-balance sheet liabilities (especially for financial entities).</p>
Article 451a(2) CRR	(b)	<p>Explanation of changes in the LCR over time</p> <p>Throughout 2021, the level of the LCR was at a safe and high level, well above the supervisory limits and internal limits resulting from the adopted risk appetite. As at 31 December 2021, the LCR ratio was 160% and was 14 percentage points lower compared to the value of the ratio on 31 December 2020, which was then 174%. The decrease in the ratio was mainly due to the increase in the required reserve rate to 2% by the Monetary Policy Council (MPC) and, consequently, from the increase in the amount of the required reserve, which, according to the LCR ratio calculation methodology, decreased the stock of available liquid assets and caused the measure to drop by approx. 10 percentage points. The decline in the ratio was also influenced by decisions on increases in the reference rate by the MPC. The increase in market interest rates contributed to a significant increase in the negative valuation of hedging derivatives, which resulted, inter alia, in for an increase in the collateral posted to the fund of the central counterparty (CCP). On the one hand, the funds contributed as collateral to the CCP fund contributed to a decrease in liquid assets, and on the other hand, the Group was required to take into account a higher outflow from exposure to derivatives (HLBA), which in total translated into a decrease in the measure by approx. 12 percentage points. The increase in the deposit base observed in 2021 (approx. PLN 5,7 billion) and the related impact of funds (in particular from retail deposits with low outflow weight) significantly exceeded the outflow of funds under granted loans (approx. PLN 2 billion) and the outflow of funds funds resulting from the redemption of subordinated bonds and BPW (in total approx. PLN 1 billion), allowed to mitigate the decrease in liquid assets and the decrease in the LCR ratio itself.</p>
Article 451a(2) CRR	(c)	<p>Explanations on the actual concentration of funding sources</p> <p>The Group's sources of financing include primarily the diversified deposit base, which covers current accounts and term deposits of retail clients (including individual clients and SMEs), financial clients and corporate clients. The deposit base is dominated by current accounts and term deposits of retail clients (approx. PLN 55.1 billion), which are characterized by a high level of stability and, due to the assigned weight, outflows in the LCR calculation are a favorable source of financing (the average weight of outflows is 6.7%). Deposits of corporate clients amount approx. PLN 15.3 billion with an average outflow weight of 35.7%, while deposits of financial clients amount PLN 2.1 billion of the base with a top-down weight of 100%.</p> <p>The other sources of financing of the Group include equity, which amounts to approximately PLN 5.9 billion, and the issued subordinated bonds, which amount to PLN 1.3 billion.</p> <p>On a monthly basis, the Group conducts an analysis of the deposit base concentration, which aims to identify the potential risk of the Group's excessive dependence on financing sources characterized by an insufficient degree of diversification. In order to estimate the concentration level, the Group determines the HCI (High Concentration Index), calculated as the ratio of the value of funds accumulated by the largest depositors to the value of the deposit base. As at 31 December 2021, the WWK was 1.09%, indicating a lack of concentration.</p> <p>In the following years, the Group assumes a moderate increase in the balance sheet total and the maintenance of customer deposits as the main source of financing (in particular from individual customers).</p>

EU LIQB on qualitative information on LCR, which complements template EU LIQ1.

Legal basis	Row number	
Article 451a(2) CRR	(d)	<p>A general description of the structure of the institution's liquidity buffer</p> <p>In order to protect against loss of liquidity, the Group maintains at an appropriate, high level unencumbered liquid assets, which are mainly characterized by a low level of credit and market risk, are relatively easy to value and sell. At the end of 2021, the Group's liquid assets amounted to PLN 16,031 million.</p> <p>The Group's liquid assets include mainly:</p> <ul style="list-style-type: none">• securities issued or guaranteed by the State Treasury (83,9%), including securities acquired as a result of the reverses REPO transaction,• exposures to Central Banks (12,2%), including NBP bills, O/N deposits and the surplus of funds accumulated on nostro accounts over the declared amount of the required reserve,• cash on hand (3,9%).
Article 451a(2) CRR	(e)	<p>Derivatives exposures and potential collateral calls</p> <p>For outflows from derivative instruments, the Group includes cash flows determined in the net amount for all derivative instruments for a particular client, constituting a liability, the value of the excess of collateral deposits placed by clients over the valuation of hedged transactions and additional outflows due to the impact of the unfavorable market scenario on transactions in derivative instruments. (HLBA), calculated as the largest absolute 30-day net collateral flow realized in the last 2 years.</p> <p>As at 31 December 2021, the Group did not identify any contractual clauses concerning the deterioration of Alior Bank's rating, which would result in the necessity to supplement the margin.</p>
Article 451a(2) CRR	(f)	<p>Currency mismatch in the liquidity coverage ratio</p> <p>The Group monitors the LCR ratio calculated for significant currencies, i.e. currencies for which the value of liabilities in a given currency exceeds 5% of the value of all liabilities. As at 31 December 2021, the Group classified PLN and EUR as significant currencies.</p> <p>When calculating the LCR for significant currencies, the exposure on derivatives and potential collateral calls are taken into account. The Group reduces the currency mismatch, among others by investing in liquid securities in foreign currencies and setting internal limits for the minimum permissible value of the ratio.</p>
Article 451a(2) CRR	(g)	<p>The Bank has no other items in the LCR calculation that are not included in the LCR disclosure formula and that are considered by the institution to be material to its liquidity profile.</p>

EU CRA: General qualitative information about credit risk

Legal basis	Row number	
Point (f) of Article 435(1) CRR	(a)	<p>Alior Bank SA is a universal deposit and credit bank, servicing natural and legal persons and other entities that are domestic and foreign persons. The main activities of the Bank include maintaining bank accounts, granting loans and cash loans, issuing bank securities and purchasing and selling foreign currency values. The Bank also conducts brokerage activities, advisory and financial intermediation as well as provides other financial services.</p> <p>The risk profile depends on the type of business and results from:</p> <ul style="list-style-type: none"> • the type of risk exposure, ie the types of risk to which the Bank is exposed in a specific type of activity, and • the risk appetite adopted by the Bank, ie the maximum level of risk that the Bank is ready to take in its operations. <p>The risk appetite parameters are closely related to the Bank's strategy, and the strategy update is carried out together with the update of the financial plan, strategy and risk appetite, planned risk profiles of individual portfolios and their shares in the Bank's balance sheet.</p> <p>When developing its plans, the Bank adopts risk appetite as targets, inter alia, levels of parameters such as CoR, NPL and NPE ratios, coverage ratio, ensuring the achievement of business goals.</p> <p>In the longer term, the Bank builds its risk profile by ensuring acceptance criteria for new sales, as well as exposure service and collection processes in line with the Bank's mid- and long-term strategic goals.</p> <p>The Bank uses Risk-Based Pricing (i.e. price dependence on the level of customer and transaction risk) to ensure the profitability of all portfolios included in the loan portfolio.</p> <p>In order to stabilize future results, the Bank applies extensive concentration limits.</p> <p>The Bank prepares risk profile assumptions, taking into account the results of stress tests, so that the risk level on the portfolio is consistent with the adopted risk appetite.</p> <p>The credit risk level is monitored on a monthly basis and in the event of significant deviations from the adopted assumptions, the Bank takes steps to restore the required risk level.</p>
Points (a) and (d) of Article 435(1) CRR	(b)	<p>The Bank has defined the credit risk strategy in relation to individual customer groups by:</p> <ul style="list-style-type: none"> • defining and introducing credit products to the offer, including a detailed description of their parameters (product sheets), such as: product buyers; subject of financing; Product designation; requirements for borrowers; minimum and maximum amount; loan period; the form of functioning of the product and its currency; principles of withdrawals, repayments and grace periods as well as a description of the collaterals used, including information on the required LtV ratio. A strictly defined product offer has been prepared for each of the homogeneous groups of customers, • determination of the expected risk profile of customers based on individual ratings or scoring assigned to them and the expected share of individual groups in the loan portfolio. The bank defined the expected distribution of scoring and rating results, • definition of the expected risk profile of the credit products implemented at the Bank, expressed in standard risk costs. Standard risk costs depend, inter alia, on on the value of the probability of impairment and the value of established collateral, • making the strategy, in terms of credit risk management, dependent on the distribution channel of individual products (ie Bank Branches, Contact Center, Internet, Agencies and Intermediaries) and the impact of each of them on the credit risk. This was reflected in credit processes dedicated to individual channels and standard risk costs, • risk diversification thanks to the application of concentration limits, • risk reduction thanks to the application of different DTI levels (an indicator expressing the ratio of the sum of monthly costs related to servicing liabilities and monthly financial liabilities other than credit liabilities to net income), • limiting credit risk by establishing loan collateral, • credit risk reduction as part of the implementation of defined monitoring processes.

EU CRA: General qualitative information about credit risk

Legal basis	Row number	
Points (a) and (d) of Article 435(1) CRR	(b)	<p>Credit Risk Limits</p> <p>Risk appetite</p> <ol style="list-style-type: none"> 1. The Bank defines the risk appetite, which is the maximum level of risk that the Bank is ready to take and accept in connection with its activities. In order to determine the risk appetite, the Bank sets limits for individual risks. The limit is the acceptable risk level estimated by the Bank, beyond which specific management actions necessary to limit further risk growth are taken. 2. The risk appetite is determined on two levels: <ol style="list-style-type: none"> 1) general - defined by the level of capital security of the total exposure to risk, and 2) detailed defined - by measures limiting exposure to particular material types of risk. 3. The risk appetite at a general level is determined by the main capital limits. The main capital limits constitute the minimum degree of coverage by the Bank's capitals of the value of the risk exposure held, where the value of the risk exposure held is measured as an unexpected loss that can be realized if individual significant risk types materialize. 4. The detailed risk appetite has been defined through detailed limits limiting the amount of exposure to particular material types of risk. <p>Concentration Limits</p> <p>In order to prevent unfavorable events resulting from excessive concentration, the Bank limits the concentration risk by setting concentration limits and standards resulting from external regulations and internal analyzes conducted by the Bank.</p> <p>Concentration risk management in relation to credit activity in the Bank concerns in particular:</p> <ol style="list-style-type: none"> 1. areas resulting from external regulations: <ul style="list-style-type: none"> • risk resulting from exposures to entities referred to in Part Four of the CRR Regulation (the so-called large exposures), • internal concentration, including the risk arising from exposure to entities referred to in Art. 79a of the Banking Law; 2. the risk resulting from exposures to entities characterized by common features such as: <ul style="list-style-type: none"> • the same segment, • the same industry and sector of the economy, i.e. entities conducting the same activity or trading in similar goods, • the same country of residence or seat, • the same province of residence or seat; 3. risk resulting from the product metric, including: the purpose of financing, currency, product type, LtV and the loan period; <ul style="list-style-type: none"> • risk resulting from exposures secured by the same type of security or secured by the same security provider (including the risk resulting from the Bank's security on securities with similar characteristics); 4. risk arising from the distribution channel; 5. the risk resulting from the applied deviations or simplified methods of assessing creditworthiness (the so-called loans per declaration); and other areas where a significant risk of concentration of lending activities may arise.

Legal basis	Row number	
Point (b) of Article 435(1) CRR	(c)	<p>In order to efficiently and effectively manage the Group's credit risk, the supervision, control and responsibility for the operation of this system have been entrusted to:</p> <ol style="list-style-type: none"> 1. the Supervisory Board of the Bank, which supervises the risk management system in the Group, on the compliance of the Group's risk-taking policy with the Group's financial strategy and plan and assesses the adequacy and effectiveness of this system 2. the Risk Committee of the Supervisory Board of the Bank, which supports the Supervisory Board of the Bank in the scope of exercising supervision over the credit risk management system in the Group 3. the Management Board of the Bank, which designs, implements and ensures the operation of a coherent credit risk management system in the Group, adjusted to the risk profile, including the rules of credit risk management and the appetite for credit risk, 4. Vice-President of the Management Board supervising material risk management, who is responsible, inter alia, for integrated credit risk management, 5. Committees supporting the Bank's Management Board in effective credit risk management: <ul style="list-style-type: none"> • the Credit Risk and Business Initiatives Committee (KRK) - with regard to credit risk, including credit concentration risk, • the Bank's Credit Committee - with regard to issuing recommendations and making credit decisions as well as issuing opinions on credit applications for decisions of the Bank's Management Board. 6. Organizational units responsible for credit risk in the scope of identification, measurement and assessment, monitoring, control, reporting and taking management actions related to risk, as well as for ensuring compliance of the internal regulations adopted by the Bank with regard to the implementation of the Risk Management Strategy in accordance with legal and supervisory regulations <ul style="list-style-type: none"> • Risk Strategy Department - in the area of write-offs, capital adequacy, setting concentration limits, credit risk stress tests, building and managing credit risk models, setting and accounting for credit risk appetite, risk reporting, • Credit Risk Department - in terms of shaping the credit risk policy and collateral policy, • The Department of Credit Operations and Debt Collection KI - in the field of monitoring, restructuring and collection of a loan granted in the KI segment and sole proprietorships in the Micro segment, whose total credit exposure does not exceed PLN 500 thousand. PLN, • The Department of Monitoring, Restructuring and Debt Collection of Business Customers - in the field of monitoring, restructuring and recovery of the granted credit in the KB segment, • The Operational Risk Management Department - in the scope of designing, organizing and managing control processes of organizational units of the Bank's risk area, • Department of KI Credit Analysis and Collateral Valuation - in the field of analysis of loan applications for the KI and Micro segments, loan administration for the Micro segment as well as the valuation and monitoring of collaterals for all segments, • Business Customer Credit Analysis Department - in the field of analysis of loan applications and administration of loans for KB, • Risk Model Validation Department - in terms of model validation processes and quantification of their risk. 7. the Audit Department, which conducts independent audits to provide the Supervisory Board and the Management Board of the Bank with objective information, including the assessment of the effectiveness and adequacy of the Group's risk management system.
Point (b) of Article 435(1) CRR	(d)	<p>The credit risk management and internal control system at the Bank operates in line with the three lines of defense model:</p> <ul style="list-style-type: none"> • The first line of defense is performed by business units that operate within the processes and policies developed by the second line of defense risk management units. • The function of the second line of defense consists of units responsible for risk management, ie units responsible for developing strategies and policies, designing risk management processes, monitoring and reporting risk, implementing control mechanisms, as well as credit analysts who operate within the framework of the developed processes and policies. • The third line of defense is the Audit Department, which is responsible for conducting independent audits of the Bank's credit risk management system in accordance with the approved audit plan.

EU CRB: Additional disclosure related to the credit quality of assets

Legal basis	Row number
Points (a) and (b) of Article 442 CRR	(a)
	<p>The Bank defines impairment triggers (impaired exposures) based on regulations and supervisory guidelines as well as its own experience in credit risk management.</p> <p>As of 1 January 2021, the Bank introduced changes to the identification of impairment triggers (default), meeting the requirements of the European Banking Authority (EBA) no. EBA / GL / 2016/07.</p> <p>The bank uses the definition of default in the formula that also covers the requirements of the definition of impairment triggers and the definition of non-performing exposures (accounting and regulatory purposes).</p> <p>The bank, in accordance with Art. 178 sec. 1, second paragraph of Regulation (EU) No 575/2013:</p> <ul style="list-style-type: none"> • for retail exposures, it applies a definition of default at the level of individual credit instruments (except in the case of material for the entire delinquency relationship), • for commercial exposures, it applies the default definition at obligor level. <p>The key triggers for impairment are:</p> <ul style="list-style-type: none"> • significant delay in repayment, understood as a delay in repayment for a period longer than 90 days, while meeting the criterion of significance of the outstanding amount, • significant deterioration of the economic and financial situation affecting the risk of the customer meeting the original contractual conditions relating to the servicing of liabilities towards the Bank, • restructuring understood as an improvement granted in terms of financing as a result of significant financial difficulties of the borrower, if, inter alia, it reduces the NPV of the asset above the set threshold, introduces a balloon installment or significantly postpones the servicing of capital installments, • submission by a business client of an application for restructuring, bankruptcy and liquidation proceedings, • effective termination of the contract, • consumer bankruptcy of an individual client, • significant deterioration of the internal scoring / rating of business clients (below the level acceptable to the Bank), if it affects the risk of the client's failure to meet its obligations, • death of an individual customer (taking into account the impact on the risk of debt service in the case of liabilities of many debtors), • lack of information about the whereabouts of an individual client, • job loss of individual clients (recognized on the basis of the client's inability to repay his debt as a result of losing his job), <ul style="list-style-type: none"> • initiation of court or enforcement proceedings, • questioning the exposure by the debtor, • extortion, • cessation of activity, • writing off / selling at a loss, • implementation of guarantees, • default of an individual customer as a result of recognition of a JDG defect. <p>The above catalog is an open set.</p> <p>In the event of an event that may constitute an indication of impairment, not covered by the above-mentioned the catalog assesses its significance for the risk of the customer's failure to meet the obligations towards the Bank based on the original contractual terms and, if it is justified, determines the premises for impairment.</p> <p>The Bank assesses all client's credit exposures in terms of identifying objective evidence of impairment on a daily basis in terms of quantitative and procedural premises and according to the most recent data on the day of the assessment in terms of premises relating to the assessment of the client's financial condition.</p> <p>The process of identifying defaults is carried out in a dedicated, centralized system, where all debtors of the Bank and the Capital Group are assessed according to uniform criteria.</p>

EU CRB: Additional disclosure related to the credit quality of assets

Legal basis	Row number	
Points (a) and (b) of Article 442 CRR	(b)	<p>All past due exposures that meet the materiality criteria and reach 90 days past due constitute default and result in recognizing the exposure as impaired. One reason when an exposure past due for more than 90 days will not result in the classification of impaired exposures is the fact that it is intangible (i.e. below 1% of the relative criterion and PLN 400 / PLN 2 thousand for retail and corporate clients, respectively).</p>
Points (a) and (b) of Article 442 CRR	(c)	<p>The Bank in accordance with the Commission Delegated Regulation (EU) No 183/2014 of 20 December 2013 supplementing Regulation (EU) No 575/2013 of the European Parliament and of the Council on prudential requirements for credit institutions and investment firms with regard to regulatory technical standards on determining the method of calculating adjustments for specific and general credit risk, when calculating capital requirements, it takes into account adjustments for specific credit risk after obtaining permission from the Polish Financial Supervision Authority to include the result of a given period in the Bank's own funds or in the event of a loss, when the relevant amounts have been deducted from Common Equity Tier 1 capital. In particular, as at 31 December 2021, the Bank, as part of specific credit risk adjustments, took into account adjustments from the last date, which included the result (loss) in equity, i.e. 30 June 2021.</p>
Points (a) and (b) of Article 442 CRR	(d)	<p>The Bank applies the definition of a forbore exposure in accordance with the requirements of Annex V to Commission Implementing Regulation (EU) No 680/2014.</p> <p>Exposures with facilities granted to clients due to a deteriorated financial situation are classified as forbearance exposures.</p> <p>For the purposes of forbearance classification, the Bank considers a customer's deteriorated financial situation when the following occurs at the time of granting the facility:</p> <ul style="list-style-type: none"> • during three months before the date of granting the facility, the overdue period on the restructured client's account exceeded 30 days or • the customer's restructured account deteriorated by at least 3 rating / scoring classes in the three months before the facility was granted or • if the customer was on a watch list in the three months prior to granting the facility. <p>For the purposes of classifying a forbearance exposure as non-performing (resulting in the identification of an impairment trigger), the Bank recognizes an event when at the time of granting the facility, at least the following are present:</p> <ul style="list-style-type: none"> • the exposure is classified as non-performing (ie there are other indications of impairment) or • as a result of the application of the convenience, the financial liabilities are reduced by the redemption of a significant part of the exposure or the provided relief causes a decrease in NPV of the restructured exposure by more than 1%, or • the applied repayment plan is not based on credible macroeconomic assumptions and the borrower's assessment of the repayment capacity and readiness, or • the amended contract contains significant deferrals as regards the commencement of repayment (for principal over 2 years) or • the revised contract provides for a large lump sum (balloon) payment at the end of the revised repayment schedule. <p>Forbearance exposures are classified into Stage 2, non-serving forbearance exposures are classified in Stage 3.</p>

The quality of NPEs broken down geographically is presented when the foreign primary exposures in all 'external' countries in all exposure classes are equal to or higher than 10% of the total primary exposures (domestic and foreign).

In connection with the above, the Alior Bank Group as at 31 December 2021 had a share of non-performing foreign exposures in the total amount of 4.94%.

EU CRC – Qualitative disclosure requirements related to CRM techniques

Legal basis	Row number
Article 453 (a) CRR	(a) The Bank does not offset balance sheet and off-balance sheet position for the purposes of credit risk mitigation techniques.
Article 453 (b) CRR	(b) <p>The Bank monitors the effectiveness of establishing collateral by:</p> <ul style="list-style-type: none"> • verification of completeness and correctness of security documentation, • checking the validity of the collateral - in the case of collateral accepted for a specified period, the collateral renewal process is carried out, e.g. an insurance policy, • verification of the current value of collateral - collateral review is carried out at least once a year, and in the case of financial collateral, the value is monitored on a daily basis. <p>The Bank reduces the risk related to individual collaterals and collateral providers by setting concentration limits, taking into account the safety buffer due to the exchange rate risk and liquidity risk, and constant monitoring of both the effectiveness of establishing collateral and its value during the loan period.</p> <p>The Bank reduces the risk related to individual collaterals and collateral providers by setting concentration limits, taking into account the safety buffer due to the exchange rate risk and liquidity risk, and constant monitoring of both the effectiveness of establishing collateral and its value during the loan period.</p>
Article 453 (c) CRR	(c) <p>The Bank allows all types and legal forms of collateral accepted under Polish law. The Bank accepts, in particular, the following legal forms of security:</p> <ul style="list-style-type: none"> • guarantees, re-guarantees and sureties, • guarantees under programs implemented by BGK, • blockades, • pledges, • transfers of ownership, • assignments of receivables, • credit insurance, • bills of exchange, • mortgage, • power of attorney to a bank account, • deposits as a special form of security, • notarized declaration of submission to enforcement pursuant to Art. 777 of the Civil Procedure Code. <p>The Bank strives to establish collateral in a manner that is adequate to the incurred credit risk and is flexible in relation to the needs and possibilities of its customers. As part of the offer for customers, there are products made available without security and those whose availability is limited by the establishment of security.</p> <p>The proportions between the level of exposure and the value of collateral are regulated by LtV ratios, taking into account various types of risks, including collateral impairment risk, foreign exchange risk, interest rate risk, liquidity risk or other risk specific to a given type of product. The Bank's clients are informed about the value of these ratios in the course of ongoing contacts with the Bankers or in the Bank's branches.</p> <p>When determining the value of the collateral, the Bank follows the principle of prudent valuation and adopts the market value or the value possible (real) to be recovered if the collateral is satisfied. The bank has appropriate tools to verify the valuation of collateral.</p>
Article 453 (d) CRR	(d) <p>The main provider of unfunded credit protection at the Bank is Bank Gospodarstwa Krajowego (BGK), which conducts guarantee or surety activities as part of the implementation of government surety-guarantee programs or on behalf and for the account of the State Treasury under the Act of 8 May 1997 on sureties and guarantees provided by the State Treasury and certain legal entities, in particular for the sector of micro-enterprises, small and medium-sized enterprises. BGK guarantees constitute 99.996% of unfunded credit protection in the bank. The suppliers of the remaining 0.004% of guarantees are banks with Baa1 and A2 ratings.</p>

EU CRC – Qualitative disclosure requirements related to CRM techniques

Legal basis	Row number	
Article 453 (e) CRR	(e)	In order to prevent unfavorable events resulting from excessive concentration, the Bank limits the concentration risk by setting concentration limits and standards resulting from external regulations and internal analyzes conducted by the Bank. Concentration risk management in relation to credit activities in the Bank concerns, inter alia, risk resulting from exposures secured by the same type of collateral or secured by the same collateral provider (including the risk resulting from the Bank's collateral on securities with similar characteristics).

EU CRD – Qualitative disclosure requirements related to standardised approach

Legal basis	Row number	
Article 444 (a) CRR	(a)	The Bank performs a quarterly review of the current creditworthiness assessments available on the authorized websites of three external creditworthiness institutions (ECAI), ie Fitch Ratings, Moody's Investors Service and Standard and Poor's Ratings Services. The Bank assigns a resultant rating for each counterparty / country, in accordance with Art. 138 - 141 CRR, based on all available credit assessments of the above-mentioned ECAIs. The Bank uses the current assessments in the process of calculating the capital requirement for credit risk.
Article 444 (b) CRR	(b)	The Bank assigns risk weights in accordance with the information on ratings external to the risk classes specified in Art. 114 (Exposures to central governments or central banks), Art. 116 (Exposures to public sector entities), Art. 120 (Exposures to institutions with a rating), Art. 121 (Exposures to unrated institutions) and Art. 122 (Exposures to enterprises).
Article 444 (c) CRR	(c)	The Bank applies the process of assigning risk weights in line with Art. 138 letters d, e and f of CRR.
Article 444 (d) CRR	(d)	The Bank uses the standard mapping system published by the EBA.

EU CCRA – Qualitative disclosure related to CCR

Legal basis	Row number	
Article 439 (a) CRR	(a)	<p>The exposure value is determined in accordance with the principles of calculating the capital requirement for counterparty credit risk using the standardized approach for counterparty credit risk in accordance with Title II of Part Three of the CRR. The balance sheet equivalent of off-balance sheet transactions as well as the balance sheet equivalent of repo transactions are determined in accordance with the CRR Regulation.</p> <p>Credit risk related to derivative instruments operating on the interbank market is minimized by setting and monitoring the limits available for individual types of transactions for selected banks.</p> <p>Credit risk resulting from the provision of derivatives to corporate clients who are not banks is accepted and limited to the amount of treasury limits held by these customers. According to the definition in force at the Bank, the treasury limit is understood as the amount of the potential credit loss that may occur as a result of the client's use of derivative instruments. The treasury limit is part of the total credit limit for turnover exposures set for clients. It is approved based on the client's creditworthiness, tested according to the standards in force at the Bank. An additional element in the decision to grant a treasury limit to the client is the recognition of his knowledge and experience in the use of derivatives and knowledge of financial markets.</p> <p>The CCP limit is set in order to limit the Bank's loss resulting from the potential insolvency of the Central Counterparty. Transactions cleared under the CCP are excluded from the counterparty's limits.</p> <p>Due to the lack of credit risk of the intermediary entity (CCP Clearer) in the clearing of transactions with the CCP, the transactions are settled within the designated CCP limit. The bank does not set a separate limit for the broker.</p>
Article 439 (b) CRR	(b)	<p>In the case of individual clients, only limits secured with cash are granted (registered pledge, blocked deposit). Corporate clients may secure limits in accordance with the catalog of collateral acceptable by the Bank (section 6.5 of this document). The best corporate clients may be offered treasury limits without collateral.</p>
Article 439 (c) CRR	(c)	<p>The Alior Bank Group does not identify any significant exposure to the risk of unfavorable correlation (the probability of default by counterparties is positively correlated with general market risk factors), and its level is monitored on an ongoing basis.</p>
Article 431 (3) and (4) CRR	(d)	<p>The aim of the Bank's activities is to minimize the actual or potential risk of losses that may be incurred by the Bank as a result of improper provision of financial services, including willful misconduct or negligence. In terms of counterparty risk, the Bank's goal is to provide customers with basic treasury products supporting the management of risk related to their business (hedging objective) and to reduce the credit risk of concluded treasury transactions.</p>
Article 439 (d) CRR	(e)	<p>The level of collateral that the Bank is obliged to provide depends as a standard on the level of the current valuation of transactions concluded under a given agreement. At the same time, the Bank has not concluded any agreement under which the counterparty would be entitled to demand the establishment of additional collateral in the event of a change in the assessment of creditworthiness. The amount of security that the Bank would have to provide if its credit rating was lowered is 0.</p>

EU IRRBBA - Qualitative information on interest rate risks of non-trading book activities

Legal basis	Row number	
Article 448(1), point (e)	a	The interest rate risk in the banking book is understood in accordance with the EBA guidelines (EBA/GL/2018/02).
Article 448(1), point (f)	b	The aim of risk management in the Group is to achieve strategic goals by maintaining the risk level of the Group's operations within the adopted risk appetite level. When managing risk, the Group ensures early identification and adequate management of all significant types of risk related to the Group's operations.
Article 448(1), points (e) (i) and (v); Article 448(2)	c	<p>IRRBB measures are determined on a daily, monthly, quarterly and annual basis.</p> <p>The main measures of IRRBB are:</p> <ul style="list-style-type: none"> • EVE (daily sensitivity of the Bank's capital to changes in interest rates), • NII (daily sensitivity of the Bank's net interest income to changes in interest rates), • BPV (daily price sensitivity of the portfolio, band, currency, instrument, accounting category) to a change in interest rates by 1 bp, • basis risk and CSRBB measures (monthly exposure to basis risk and CSRBB), • dynamic forecasts of IRRBB measures (quarterly forecasts of the risk level), • customer option risk measures (determined quarterly exposure to customer option risk), • IRRBB stress tests (stress tests determined quarterly, understood as GRP according to EBA guidelines), along with reverse stress tests.
Article 448(1), point (e) (iii); Article 448(2)	d	<p>The scenarios used by the Bank in terms of EVE and NII measures include:</p> <ul style="list-style-type: none"> • 6 scenarios set out in the EBA guidelines (EBA / GL / 2018/02) • 4 scenarios of parallel shifts of interest rate curves • 3 internal scenarios determined by business stress tests.
Article 448(1), point (e) (ii); Article 448(2)	e	The bank does not apply different assumptions.
Article 448(1), point (e) (iv); Article 448(2)	f	<p>The Bank secures the interest rate risk by:</p> <ul style="list-style-type: none"> • active policy in the field of shaping deposit and credit products, • applying hedge accounting for deposits without a specified maturity date and the Bank's equity, • securing positions as part of Treasury's business.
Article 448(1), point (c); Article 448(2)	g	The assumptions used by the Bank are set out in the EBA guidelines (EBA/GL/2018/02).
Article 448(1), point (d)	h	The risk measures used at the Bank are consistent with the EBA guidelines (EBA / GL / 2018/02), especially with regard to the economic sensitivity of capital (EVE). The Bank uses the scenarios specified in the guidelines as well as the parameters and assumptions specified therein. The second important measure is the sensitivity of the Bank's net interest income to changes in interest rates (NII). The assumptions of NII are the same as for EVE. NII is calculated on a straight-line basis, without taking into account any optionality, and a relation, the purpose of which is to take into account any restrictions on the level of interest rates of individual products. In the last year, the assumptions of the above measures were not modified, and the changes in their levels are the result of the Bank's policy aimed at reducing sensitivity and increasing interest rates.
Article 448(1), point (g)	(1) (2)	Pursuant to the provisions of internal regulations, the Bank has a maturity date of no more than 5 years, which translates into an average maturity of 2.5 years.

EU ORA - Qualitative information on operational risk

Legal basis	Row number	
Points (a), (b), (c) and(d) of Article 435(1) CRR	(a)	<p>The Bank has a formalized operational risk management system under which it counteracts the occurrence of operational events and incidents and reduces losses in the event of risk materialization. Operational risk management includes identification, measurement and assessment of operational risk, control, monitoring, reporting and management activities. The Alior Bank SA Capital Group is supported by the OpRisk IT system, in which, inter alia, operating events and losses, KRI are recorded, and the results of scenario analyzes and self-assessment are recorded.</p> <p>The operational risk management strategy is included in the regulation, the Risk Management Strategy of the Alior Bank SA Capital Group approved at the level of the Supervisory Board. The principles of operational risk management along with the identification of roles and responsibilities, taking into account the active involvement of the Bank's Supervisory Board, Management Board and committees, are set out in the Operational Risk Management Policy at Alior Bank SA (approved at the level of the Supervisory Board).</p> <p>Due to the use of the advanced operational risk measurement method (AMA), the Alior Bank SA Capital Group striving to limit the risk of materialization of the effects of rare but potentially severe operational events, it purchased a number of insurance policies. Above the policies covered, inter alia, insurance in the field of: property (including electronic equipment), civil liability, penal fiscal liability and professional liability.</p>
Article 446 CRR	(b) i (c)	<p>Internal capital for operational risk is measured using the AMA method. Based on the AMA method, Alior Bank internally built a statistical model used to estimate the level of operational risk based on the Loss Distribution Approach (LDA) method.</p> <p>For the purposes of determining the own funds requirements for operational risk at the consolidated level of the Alior Bank SA Capital Group, two methods are used jointly, i.e. the advanced measurement method (AMA) - in the scope of activities carried out by Alior Bank SA and the standardized approach (TSA) - with regard to the operations of the branch in Romania and the operations of the company subject to consolidation - Alior Leasing Sp. z o.o.</p> <p>On 10 February 2021, the Bank received a permit from the Polish Financial Supervision Authority to implement significant changes to the AMA method. In particular, the change concerns the inclusion of non-insurance recoveries in the model. This is the next step related to strengthening the operational risk management system in the Group and reflecting the actual level of this risk in the measurement.</p>
Article 454 CRR	(d)	<p>In connection with the use of the advanced method of measuring operational risk (AMA), the Alior Bank SA Group, striving to reduce the risk of materialization of the effects of rare but potentially severe operational events, purchased a number of insurance policies. Above the policies covered, inter alia, insurance in the field of: property (including electronic equipment), civil liability, penal fiscal liability and professional liability.</p>
Recommendation M		<p>Operational risk management in the Alior Bank SA Group is supported by the OpRisk IT system, which records, among others, operational events and losses, KRI, and records the results of scenario analyzes and self-assessment.</p> <p>The gross value of operational risk costs in the Alior Bank SA Capital Group for 2021 amounted to PLN 67.62 M. The largest loss was related to the incorrect execution of a transfer in the amount of PLN 42.48 M due to human error (loss in the category of Transaction execution, delivery and management of operational processes). This loss was fully recovered after five days (difference between the loss and recovery posting dates). Operating risk costs, including recoveries, for 2021 amounted to PLN 22.70 M and were in line with the target and limit for operating risk costs for 2021.</p>

EU ORA - Qualitative information on operational risk

Legal basis

Row number

Recommendation M

The largest share in the gross operating risk costs were costs in the categories of execution of transactions, delivery and management of operational processes (the abovementioned error in making a transaction) and Customers, products and operating practices (e.g. due to provisions for disputes regarding CHF-indexed loans and statutory interest payments on the commission refunded upon early loan repayment - in accordance with the judgment of the TSUE of 11 September 2019). Due to the costs incurred by the Bank and the constant striving to reduce the operational risk in this area, the Bank took steps to reduce the risk of similar events in the future, including implemented additional control mechanisms, made changes to processes and systems, developed additional training for the Bank's employees.

Operating risk costs in the Alior Bank SA Group in 2021 by category:

MPLN

Loss category	Operating risk costs
Internal fraud	0.16
External fraud	6.78
Employment Policy and Workplace Safety	1.77
Clients, Products, and Operating Practices	13.47

EU REMA - Remuneration policy

Legal basis	Row number
Points (a), (b) and(c) of Article 450(1) CRR	<p>(a)</p> <p>The Remuneration Policy in force at the Bank, including by its provisions all employees, is a basic document in the field of policy and rules for shaping the remuneration of the Bank's employees, with particular emphasis on the principles of remunerating employees who, due to the special type of their role in the Bank's risk management system, were covered by a separate regulatory regime in this regard, i.e. :</p> <ul style="list-style-type: none"> • persons Having a Material Impact on the Risk Profile (MRT), including the Management Board • persons exercising control functions, • employees of the Compliance Department and the Audit Department, • employees involved in offering or distribution of banking and investment products and services and insurance. <p>The Nomination and Remuneration Committee of the Supervisory Board was established in the Bank. The tasks of the Committee include:</p> <ul style="list-style-type: none"> • issuing opinions on the remuneration policy in order to ensure compliance of the remuneration principles with the regulations, mainly with the Regulation of the Minister of Development and Finance of 6 March 2017 on the risk management system and internal control system, remuneration policy and the detailed method of estimating internal capital in banks (Journal U. of 2017, item 637, as amended), in accordance with the principles of stable and prudent risk, capital and liquidity management, and with particular emphasis on the long-term interests of the Bank and the interests of its shareholders, • issuing opinions on the classification of positions, which is subject to the remuneration policy with regard to persons having a significant impact on the Bank's risk profile ("MRT"), giving opinions on annual goals and assessing the results of their work; reviewing and monitoring MRT variable remuneration, • preparing opinions, assessments or recommendations on candidates for the Bank's Management Board, on concluding, changing and terminating contracts with members of the Management Board, on the structure, size, composition and effectiveness of the Management Board as a body, and on the knowledge, skills and experience of individual members of the Management Board, • preparing opinions, assessments or recommendations on other personal matters in which the Supervisory Board or the Committee is competent in accordance with the applicable internal regulations and the provisions of generally applicable law. <p>In 2021, the Nomination and Remuneration Committee held 12 meetings.</p>
	<p>(b) i (c)</p> <p>Policy Objectives:</p> <ul style="list-style-type: none"> • promoting proper and effective risk management and discouraging excessive risk taking (exceeding the acceptable risk level at the Bank) in order to maintain a solid capital base and bearing in mind the long-term interest of the Bank, its shareholders and clients, • support for the implementation of the Bank's sustainable development strategy and prudent risk management policy, • limiting the conflict of interest, • Maintaining a transparent relationship between individual performance and individual reward, by focusing on goals related to responsibility and real impact, • ensuring that the Bank's employees act in the best interests of their clients, including providing them with clear and transparent information about the services and products offered by the Bank. <p>In achieving the above goals, the special role of the Policy in relation to MRT.</p>

EU REMA - Remuneration policy

Legal basis	Row number	
Points (d) of Article 450(1) CRR	(c) i (d)	<p>The main policy submissions in relation to MRT:</p> <ul style="list-style-type: none"> • remuneration consisting of fixed remuneration and variable remuneration, • failure to grant MRT unspecified retirement benefits, • MRT's commitment not to use individual hedging strategies or remuneration and liability insurance to undermine the risk alignment effects of their remuneration system. • except for persons exercising control functions, the basis for determining the total amount of variable remuneration assessment of the results of MRT and a given organizational unit as well as the results of the Bank in the area of responsibility of that person, taking into account the results of the entire Bank, • maximum ratio of MRT variable remuneration to fixed remuneration: 100%, • at least 50% of the MRT variable remuneration as an incentive to pay special attention to the long-term good of the Bank <p>and consisting of financial instruments related to the Bank's shares. The remaining part of the variable remuneration paid in cash as Cash Variable Remuneration,</p> <ul style="list-style-type: none"> • at least 40% of the MRT variable remuneration, and if the MRT variable remuneration is for a particularly high amount, at least 60% of the variable remuneration - it is a deferred remuneration, • variable remuneration of the Management Board adjusted to the provisions of the Act of June 9, 2016. on the principles of shaping the remuneration of people managing certain companies. <p>The policy is subject to an annual review of its relevance and adequacy, and if necessary, it is reviewed by the Appointment and Remuneration Committee and adopted by the Management Board and approved by the Supervisory Board.</p>
Points (e) and (f) of Article 450(1) CRR	(e), (f) and (g)	<p>The Bank's results, adopted in order to determine the variable remuneration components, take into account the Bank's cost of risk, cost of capital and liquidity risk in the long-term perspective. The results are assessed in three years so that the amount of the variable remuneration takes into account the Bank's business cycle and the risk related to the business activities conducted by the Bank. When assessing individual MRT results, financial and non-financial criteria are taken into account, in particular, one or more of the following criteria are adopted as financial criteria: net result of the Bank or its capital group, return on capital, capital adequacy ratios of the Bank, liquidity ratios of the Bank or its group. capital, profitability ratios of the Bank or its capital group, other adopted for individual purposes to be achieved by individual employees In particular, one or more of the following criteria are adopted as non-financial criteria: and internal regulations, employment durability criterion, compliance assessment criterion and risk assessment carried out in accordance with separate internal regulations, others adopted for individual purposes for implementation for individual employees.</p> <p>As regards the variable remuneration of MRTs who are Members of the Bank's Management Board, the variable remuneration is due to a given Management Board Member after approval of the Management Board's report on the Bank's operations and financial statements for the previous financial year and granting that Member a vote of approval for the performance of his duties by the General Meeting.</p> <p>With the exception of control functions, the basis for determining the total amount of the Variable Remuneration is the assessment of the results of MRT and a given organizational unit as well as the Bank's results in the area of responsibility of that person, taking into account the results of the entire Bank.</p>
Points (j) of Article 450(1) CRR	(h)	This disclosure of the Bank does not apply.
Points (k) of Article 450(1) CRR	(i)	The Bank does not use the derogation specified in Art. 94 sec. 3 of the CRD pursuant to Art. 450 sec. 1 point k) CRR.

Management Board's statement

The Management Board of Alior Bank SA hereby declares that the arrangements described in the Report are adequate to the facts, and the risk management systems used are appropriate from the point of view of the risk profile and strategy of the Alior Bank SA Group.

Management Board's statement on the liquidity risk

In 2021, the Bank's Management Board reviewed annually the expected level of liquidity risk tolerance defined by a system of limits imposed on liquidity risk, which results from the risk appetite included in the assumptions of the overall strategy of the Bank's operations and is consistent with it, and by setting a "survival horizon" taking into account the scenarios with varying degrees of severity and probability of materialization.

Alior Bank, as an institution operating mostly on the retail market and independent of a foreign parent institution, is characterized by a reduced level of liquidity risk as a consequence of maintaining a stable deposit base (characterized by high stability at the level of 95.5%), as well as low involvement in long-term mortgage loans denominated in in foreign currencies.

As at 31 December 2021, all liquidity measures were at a safe level, incl. LCR was 160%, NSFR reached the level of 132%, and the total liquidity buffer amounted to PLN 17,4 billion against the required level of PLN 14,7 billion resulting from the shock scenario. Detailed information on the Bank's liquidity risk profile is provided in the Disclosures in the section on liquidity risk.

The liquidity risk management systems used by the Bank ensured in 2021 the liquidity risk at a level consistent with the risk appetite defined by the Supervisory Board. The process of assessing the adequacy of liquidity resources (ILAAP) in place at the Bank ensured that the Bank had stable funding and appropriate liquidity buffers for timely payment of liabilities, also in stress situations, and compliance with supervisory liquidity requirements. Throughout the period, liquidity remained at a safe level, which was reflected in the levels of liquidity ratios significantly above the limits. For this reason, the Bank did not identify the need to take extraordinary measures to improve the liquidity situation.

The Management Board of the Bank hereby declares that the arrangements for liquidity risk management described in Disclosures are adequate to the actual state of affairs, and that the liquidity risk management systems used are appropriate from the point of view of the profile, scale of operations, strategy and financial plans of the Alior Bank SA Group.
